- Web development
- Web hosting
- Web domain
- Databases
- API
- Support
- Sales
- Source control
- SSH/FTP

## Experience

### FS.NET Software - Fullstack Software Developer 2022 - Present

Freelance developer specializing in creating applications for Android and Windows, using C#, Unity and databases. I have successfully developed a variety of applications, including point of sale systems, appointment booking applications, productivity tools, and more.

### Aurora Games - Unity Game Developer 2019 - 2022

Responsible for the development of Aurora, a mobile application that blended augmented reality, video games, and a social network, allowing people to connect with others based on common hobbies. The project, built using Unity, C#, and SQL, was successfully pitched and sold in a shark tank.

### Clouder - Application & Customer support 2017 - 2019

Responsible for ensuring the functionality and stability of the company's applications, addressing technical issues, providing user support, and managing incidents.

### FS.NET Hosting - Web Hosting 2016 - 2021

As the owner of a web hosting service, I monitored domains, created websites, provided cPanel licenses, offered webmail services, managed MySQL databases, issued SSL certificates, and provided technical and customer support.

## Education

### Online Courses and Training 2014 - Present

Continuously enhancing my skills through a variety of online courses, certifications, and training, covering topics of all kinds, including but not limited to technology.

### E.T. N°24 Secondary School 2009 - 2016

Business Administration Technician
